

Key Vocabulary	
<b>living</b>	Animals and plants are living things. Living things need to have their basic needs met to survive.
<b>used to be alive</b>	If something used to be alive (or was once alive), it means it used to be living but isn't anymore. Now, it is dead.
<b>never alive</b>	Things made out of metal, glass, plastic or rock were never living because they did not move by themselves, grow or need food.
<b>survive</b>	To survive means to stay alive.
<b>basic needs</b>	Basic needs are the things that living things need to stay alive (water, food, shelter).

Key Knowledge		
Alive	Once Alive	Never Alive
		

## Basic Needs

All living things need:

			
shelter	food	air	water

## Key Vocabulary

<b>habitat</b>	A habitat is the natural place in which something lives. A habitat provides living things with everything they need to survive.
<b>microhabitat</b>	A microhabitat is a very small habitat that minibeasts live in.
<b>depend</b>	Living things in a habitat depend on each other to survive. This means they need each other to meet their basic needs.
<b>food sources</b>	Food sources are the things that living things eat.
<b>food chains</b>	A food chain shows how each animal gets its food. Food chains are one of the ways that living things depend on each other to stay alive.

## Key Knowledge

Here are some examples of **habitats**.

woodland

urban

coastal

ocean

polar

desert

Here are some examples of **microhabitats**.

under rocks

under logs

under leaves

In a **food chain**, each arrow means 'is eaten by'.

grass

caterpillar

sparrow

hawk
